### Preferred Options Report: Volume 3

ASTs, Figures and Drawings

22 October 2012

47037827 / S105296

Prepared for:  
DRD Roads Service

UNITED  
KINGDOM &  
IRELAND

REVISION SCHEDULE					
Rev	Date	Details	Prepared by	Reviewed by	Approved by
D2	Date	Second Draft	John McBride Engineer	Michael Megarry Principal Engineer	Kenneth O'Hara Technical Director
			Graham McFarland Senior Engineer		
			Ali Bastekin Technical Director		
			Philip Heyburn Associate		
			Gareth Coughlin Principal Environmental Scientist		
			Russell Bissland Technical Director		

**Limitations**

URS Infrastructure & Environment UK Limited ("URS") has prepared this Report for the sole use of DRD Roads Service ("Client") in accordance with the Agreement under which our services were performed [Major Works Planning, Assessment and Delivery Contract, April 2005]. No other warranty, expressed or implied, is made as to the professional advice included in this Report or any other services provided by URS. This Report may not be relied upon by any person other than DRD Roads Service without the prior and express written agreement of URS.

The conclusions and recommendations contained in this Report are based upon information provided by others and upon the assumption that all relevant information has been provided by those parties from whom it has been requested and that such information is accurate. Information obtained by URS has not been independently verified by URS, unless otherwise stated in the Report.

The methodology adopted and the sources of information used by URS in providing its services are outlined in this Report. The work described in this Report was undertaken between 26 March 2009 and 22 October 2012 and is based on the conditions encountered and the information available during the said period of time. The scope of this Report and the services are accordingly factually limited by these circumstances.

Where assessments of works or costs identified in this Report are made, such assessments are based upon the information available at the time and where appropriate are subject to further investigations or information which may become available.

URS disclaim any undertaking or obligation to advise any person of any change in any matter affecting the Report, which may come or be brought to URS' attention after the date of the Report.

Certain statements made in the Report that are not historical facts may constitute estimates, projections or other forward-looking statements and even though they are based on reasonable assumptions as of the date of the Report, such forward-looking statements by their nature involve risks and uncertainties that could cause actual results to differ materially from the results predicted. URS specifically does not guarantee or warrant any estimate or projections contained in this Report.

Unless otherwise stated in this Report, the assessments made assume that the sites and facilities will continue to be used for their current purpose without significant changes.

Where field investigations are carried out, these have been restricted to a level of detail required to meet the stated objectives of the services. The results of any measurements taken may vary spatially or with time and further confirmatory measurements should be made after any significant delay in issuing this Report.

Costs may vary outside the ranges quoted. Whilst cost estimates are provided for individual issues in this Report these are based upon information at the time which can be incomplete. Cost estimates for such issues may therefore vary from those provided. Where costs are supplied, these estimates should be considered in aggregate only. No reliance should be made in relation to any division of aggregate costs, including in relation to any issue, site or other subdivision.

No allowance has been made for changes in prices or exchange rates or changes in any other conditions which may result in price fluctuations in the future. Where assessments of works or costs necessary to achieve compliance have been made, these are based upon measures which, in URS' experience, could normally be negotiated with the relevant authorities under present legislation and enforcement practice, assuming a pro-active and reasonable approach by site management.

Forecast cost estimates do not include such costs associated with any negotiations, appeals or other non-technical actions associated with the agreement on measures to meet the requirements of the authorities, nor are potential business loss and interruption costs considered that may be incurred as part of any technical measures.
